

DEMAND LETTER FOR IMMEDIATE CERTIFICATION AND BALLOT PLACEMENT

TO: The Honorable Sam Richards, Mayor of the City of Festus, Missouri

AND: The City Council of the City of Festus, Missouri

AND: The City Clerk Mrs. Leah Smith of the City of Festus, Missouri

RE: DEMAND FOR IMMEDIATE CERTIFICATION AND PLACEMENT OF HYPERSCALE DATA CENTER MEASURE ON SPECIAL ELECTION BALLOT

I. INTRODUCTION

This letter constitutes formal notice to the City of Festus, Missouri, of a citizen petition demanding that the Mayor, City Council, and City Clerk immediately certify a binding ordinance measure for submission to the Jefferson County Election Authority and place that measure on the ballot for a special election to be publicly announced within (30) days of the receipt of this Demand letter, to be held on the earliest date thereafter permitted by Missouri law and the procedures of the Jefferson County election authority.

The attached petition, bearing signatures from over Fourteen-Hundred residents and registered voters of the City of Festus, constitutes a clear expression of the will of the people that they—not the City Council or private developers—shall decide whether hyperscale data centers are permitted within city limits.

The City of Festus has a legal and fiduciary duty to respect that will. This letter formally demands that the City fulfill that duty immediately.

II. LEGAL BASIS AND AUTHORITY

A. Missouri Constitution and Statutory Authority for Local Ballot Measures

The Missouri Constitution, Article III, Section 52, establishes the principle that the people retain the ultimate authority to govern themselves on matters of local concern. Missouri law recognizes that municipalities may, by ordinance or resolution, place questions on the ballot for citywide voter approval. (See, e.g., Missouri Revised Statutes § 115.011 et seq.)

Although the City of Festus operates as a third-class city and may not have an explicit “local initiative” provision codified in Chapter 105 of the Festus Code, the City Council retains the inherent and statutory power to refer questions to the voters by ordinance or resolution.

B. City Council’s Duty to Respond to Citizen Petitions

A citizen petition bearing signatures from a substantial number of registered voters constitutes an expression of public sentiment that deserves serious consideration and action by elected officials. While not legally binding in the absence of a formal initiative ordinance, the receipt of such a petition triggers a fiduciary duty on the part of the City Council to:

1. Acknowledge receipt of this Petition
2. Schedule City action on behalf of the signers of this Petition

Failure to do so violates the public trust and the fundamental democratic principle that government is accountable to the governed.

C. Special Election Authority

Under Missouri law, a third-class city may call a special election to submit a question to the voters. The City Council's authority to do so is clear. There is no statutory impediment to scheduling, by appropriate coordination with the Jefferson County Election Authority, a special election at the earliest date permitted by law.

III. THE PETITION

A petition bearing over fourteen-hundred verified signatures from residents and registered voters of the City of Festus has been presented to the City, demanding that the following question be placed on the ballot:

"Shall the City of Festus adopt an ordinance prohibiting hyperscale data centers within the city limits, requiring voter approval for any proposed hyperscale data center project, and providing that this policy may not be changed without a vote of the people for ten (10) years?"

This petition represents the clearly expressed will of a meaningful segment of the Festus electorate. It deserves to be honored through immediate action; not indefinite delay or procedural obstruction.

IV. SPECIFIC DEMANDS

The undersigned, on behalf of the petitioners, formally demand that the City of Festus take the following actions immediately and without further delay:

- 1) Acknowledge receipt of this Petition by including this Demand Letter, attached Petition, Proposed Ballot Measure and Ordinance as part of the official record, and that the minutes reflect that they were submitted and received;
 - a) Display a copy of this Demand Letter, in its entirety, at City Hall in view of the public and in the minutes portal for the City, as it is a matter of public business;
 - b) Discuss this matter in view of the public, in open session, at the next regularly scheduled meeting or a special meeting called for this purpose;
- 2) Schedule City action on behalf of the signers of this Petition: Include a Motion on the agenda for the next regular meeting, or a special meeting called for this purpose, to vote on whether to refer the question to voters.
 - a) Adopt the language provided for the ballot measure and call for special election by instructing the City Clerk to submit the measure to the Jefferson County Election Authority for placement on a special election ballot and announce this within thirty (30) days of the City's receipt of this demand, or on the earliest date permitted by Missouri law and Jefferson County election procedures.
 - i) Public Notice: The City shall publish public notice of the ballot measure and election date in compliance with Missouri law, including posting on the City website, at City Hall, and in

appropriate local media, so that all Festus voters have prompt and adequate notice of their right to vote on this question.

b) Enact Proposed Ordinance when a majority of the City votes in favor of it.

V. LEGAL CONSEQUENCES OF NON-COMPLIANCE

A. Breach of Public Trust and Fiduciary Duty

The process by which this proposed data center has been advanced has been marked by a profound lack of transparency and a pattern of conduct that appears designed to withhold material information from the public. Documents produced in response to Sunshine Law requests show a concerted effort by city officials to conduct substantive discussions about this project outside of public view, to structure public notice in a manner unlikely to reach affected residents, and to coordinate communications in ways that obscured the true scope and timing of the proposed development.

City officials devoted substantial time to private meetings and communications with the developer and select self-identified "stakeholders", yet did not meaningfully discuss this project in open session or otherwise inform Festus residents in their official capacities. Members of the City Council sought opinions about data centers from residents of other communities, while failing to engage their own constituents in Festus on a matter of clear local impact. These actions, taken together, suggest an effort to evade the spirit and purpose of Missouri's open-meeting and open-records requirements and to avoid robust public scrutiny of a project with far-reaching implications for this community.

According to Alderman Mike Cook's response to an inquiry, City officials have been visiting data center sites around the country and discussing the possibility of locating such a facility in this area for more than two and one-half years. The business of the City is the people's business and, by law, matters of public business and matters of significant public interest must be conducted as openly as possible. The Mayor, the City Clerk, and the City Council have a duty to keep the public informed about significant development proposals, particularly those that can fundamentally alter the character, infrastructure, and environmental conditions of the community. A project of this magnitude demands the highest level of transparency and public engagement, not secrecy and after-the-fact disclosure.

The manner in which notice was provided for Planning and Zoning consideration of this project exemplifies the broader problem: the sign posted for public notice was placed in a location where it could not reasonably be read by passersby traveling at highway speeds and was the subject of joking by public officials in text messages, underscoring their awareness of its practical ineffectiveness. Public officials have, at times, referred to members of the public as "uneducated" when they raised concerns about the project, betraying a dismissive attitude toward citizen participation. The City Administrator Greg Camp sought the developer's "permission" before informing the public about the project, characterizing that disclosure as "letting the cat out of the bag," and, when requested by the developer, provided names and addresses of residents who had signed up to speak in opposition at the next council meeting, again prioritizing the developer's interests over those of the citizens.

Festus City Administrator Greg Camp improperly disclosed the names and home addresses of residents who had registered to speak in opposition to a proposed large development project at an upcoming public meeting. This information was provided directly to the project developer before the speaker list was available to the general public and prior to the public meeting.

Text messages between Mr. Camp and the developer reveal that Mr. Camp transmitted a list identifying individual opponents by name along with their home addresses and positions on the project. This disclosure was not made to the public at large, but selectively to the developer whose project these residents were preparing to criticize.

Providing a project proponent with advance access to opponents' personal contact information, including their home addresses, is a serious breach of public trust. It creates a risk of retaliation, chills public participation, and undermines residents' confidence that they can safely petition their government and speak at public hearings without being secretly targeted. This kind of targeted disclosure of citizens' home addresses to an interested private party is functionally similar to doxxing: it weaponizes personal information against individuals because of their civic engagement and viewpoint.

Residents of Festus must be able to participate in public meetings without fear that the City's top administrator will secretly deliver their names and home addresses to the very developer whose project they oppose. The Mayor, and City Council ratify the actions of their administrator, and adopt it as their own, when they take no action in public to admonish it.

B. Grounds for Recall and Legal Action

The City Council's refusal or undue delay in placing this question on the ballot, despite the clear will expressed in this petition, would constitute:

- A violation of the public trust and the fiduciary duty owed by elected officials to their constituents;
- A denial of the people of Festus's opportunity to decide a matter of substantial local concern;
- A potential basis for legal action, including but not limited to mandamus or other appropriate judicial relief; and
- Grounds for public accountability measures.

In the event the City of Festus fails, refuses, or otherwise neglects to take all actions necessary to submit this matter to the qualified voters of Festus at a special election, as demanded herein, the undersigned residents hereby place the Mayor, the City Clerk, and each member of the Festus City Council on formal notice that the people fully intend to exercise their right to seek the recall of said officials pursuant to Missouri law governing third-class cities, including sections 77.650–77.660, RSMo, and will promptly commence the preparation, drafting, and circulation of recall petitions for each, immediately upon such petitions being ready and in full compliance with the procedural requirements of the applicable Missouri statutes.

The facts outlined above, among others, will constitute the grounds for cause should it become necessary for the residents of Festus to pursue recall proceedings. The public has a right to honest, transparent governance, and to full and fair disclosure of major development proposals before decisions are made that will shape the future of their community.

While the undersigned hope that good-faith recognition of the people's will will resolve this matter, if the City does not act in accordance with this demand, the people will move forward expeditiously to complete recall petitions.

VI. TIMELINE FOR COMPLIANCE

This demand is not a suggestion or a request for indefinite future consideration. We expect:

The City shall, within thirty (30) days of its receipt of this demand, publicly announce a special election to submit this question to the qualified voters, such special election to be held on the earliest date thereafter permitted by Missouri law and the procedures of the Jefferson County election authority.

VII. CONTACT AND SERVICE

This letter is being hand delivered to the Mayor, City Council members, and City Clerk and entered as part of the public record in that public meeting. Copies are being retained, for the record, and will be shared with Festus residents and members of the media to ensure full transparency.

All responses and official actions shall be spoken on the record and included in the official minutes of a regular or special meeting of the full City Council of Festus.

VIII. CONCLUSION

The people of Festus have spoken. They have gathered over Fourteen-hundred signatures, a number that well exceeds the number of people who voted in the last mayoral election. They have made a clear and direct demand that they be allowed to vote on whether hyperscale data centers are permitted in their city. It is now the duty of the Mayor, City Council, and City Clerk to honor the will of the people and ensure this question is placed on the ballot without further delay.

We expect prompt action and full compliance with this demand.

Respectfully submitted,

WE THE PEOPLE

PROPOSED ORDINANCE

AN ORDINANCE OF THE CITY OF FESTUS, MISSOURI, A THIRD-CLASS CITY, TO DEFINE AND PROHIBIT HYPERSCALE DATA CENTERS WITHIN THE CITY LIMITS, TO REQUIRE VOTER APPROVAL FOR ANY EXCEPTION, AND TO LIMIT AMENDMENT OR REPEAL FOR TEN YEARS.

BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF FESTUS, MISSOURI, AS FOLLOWS:

Section 1. Findings and Purpose.

A. The City Council finds that very large-scale (“hyperscale”) data centers can require extraordinary amounts of electrical power, water, land, and infrastructure, impose significant noise and visual impacts, and health and safety concerns for residents.

B. The City Council further finds that such facilities can commit substantial portions of the City’s utility and infrastructure capacity for decades, and that the decision to host or exclude hyperscale data centers within the City limits is a matter of long-term public policy that should be determined by the residents of Festus.

C. The purpose of this Ordinance is to (1) define and prohibit hyperscale data centers within the City limits; (2) require voter approval for any proposal to authorize or facilitate such a facility; and (3) ensure that this policy cannot be altered without a vote of the people for a period of ten (10) years.

Section 2. Definitions.

For purposes of this Ordinance, the following terms shall have the meanings set forth below:

A. “**Data Center**” means any facility used primarily for the housing, operation, and networking of computer servers and related information technology equipment for the purpose of processing, storing, or transmitting digital data, together with associated power, cooling, security, and network infrastructure.

B. “**IT Power Capacity**” means the maximum electrical power, measured in megawatts (MW), that can be delivered to information-technology equipment (including servers, storage devices, and network equipment) as limited by the facility’s electrical design, transformers, switchgear, uninterruptible power supplies, and cooling systems, and includes both currently installed capacity and any additional capacity reserved, committed, or planned in a utility service agreement, development agreement, or facility design.

C. “**Hyperscale Data Center**” means any Data Center, or group of related facilities on one or more contiguous or commonly controlled parcels, that meets **any** of the following thresholds, whether at initial construction or at any time thereafter:

1. The facility has an installed or planned IT Power Capacity of **twenty (20) megawatts or greater**, including any phase, expansion, or reserved or committed future capacity; or
2. The facility is designed to accommodate **five thousand (5,000) or more servers** (physical or virtualized compute nodes) in the aggregate; or

3. The facility provides **ten thousand (10,000) square feet or more of data-hall or “white space” area**, meaning enclosed space primarily used for racks, servers, storage, and network equipment, exclusive of general office, loading, or warehouse areas; or
4. The facility, together with any functionally related or phased facilities under common ownership, common control, common branding, or shared infrastructure (including shared driveways, substations, cooling plants, or fiber laterals) within a **one (1) mile radius**, has a combined IT Power Capacity of **twenty (20) megawatts or greater** or a combined data-hall or “white space” area of **ten thousand (10,000) square feet or greater**.

D. “**City Approval**” means any zoning, land-use, building, subdivision, utility, tax-incentive, annexation, or development approval, permit, variance, license, agreement, or other action by the City, the City Council, the Planning and Zoning Commission, the Board of Adjustment, any City board or commission, or any City officer acting in an official capacity.

Section 3. Prohibition of Hyperscale Data Centers.

A. A Hyperscale Data Center shall not be a permitted, conditional, or special use in any zoning district within the corporate limits of the City of Festus, Missouri.

B. No City Approval shall be granted for the siting, construction, expansion, operation, or provision of utilities or incentives for any project that meets or would meet the definition of a Hyperscale Data Center.

C. The City, its officials, and its employees shall not enter into, approve, or execute any ordinance, resolution, agreement, permit, or other action that authorizes, facilitates, or supports the siting, construction, expansion, or operation of a Hyperscale Data Center within the City limits, except as expressly permitted under Section 4 of this Ordinance.

Section 4. Voter-Approval Requirement and Ten-Year Limitation.

A. For a period of **ten (10) years** from the effective date of this Ordinance, no ordinance, resolution, development agreement, annexation, zoning change, permit, utility service agreement, tax incentive, or other City Approval that authorizes or facilitates the siting, construction, expansion, or operation of a Hyperscale Data Center within the corporate limits of the City of Festus shall take effect unless:

1. The ordinance or measure is submitted to the qualified voters of the City of Festus at a citywide election; and
2. A majority of those voting on the question vote in favor of such ordinance or measure.

B. For the same ten (10) year period, this Ordinance shall not be amended, repealed, or superseded, in whole or in part, by the Mayor and City Council or by any other City body, except by an ordinance or measure submitted to and approved by a majority of the qualified voters of the City of Festus voting on the question at a citywide election.

C. After the expiration of the ten (10) year period described in subsections A and B, this Ordinance shall remain in full force and effect unless and until amended or repealed in the manner provided by law; however, the limitations in subsections A and B requiring voter approval as a condition to amendment, repeal, or exception shall no longer apply.

Section 5. Anti-Evasion; Aggregation of Facilities.

A. No subdivision of land, division of ownership, use of multiple tenants, phasing of construction, or use of multiple affiliated or related entities shall be permitted to avoid classification as a Hyperscale Data Center if the functional characteristics and aggregate capacity of the facilities meet or exceed any of the thresholds set forth in Section 2(C).

B. In determining whether the thresholds in Section 2(C) are met, the City shall aggregate all data-center buildings, phases, expansions, and related facilities that:

1. Share common ownership, common control, or common branding; or
2. Share infrastructure or services, including but not limited to access drives, parking, onsite or offsite substations, electrical distribution, cooling plants, or dedicated fiber or network laterals;
or
3. Are subject to a common development agreement, incentive agreement, annexation agreement, master plan, or coordinated development application.

Section 6. Relationship to Other Data Center Uses.

A. Nothing in this Ordinance shall be construed to prohibit or restrict the development or operation of Data Centers that do not meet the definition of a Hyperscale Data Center, except as may be provided elsewhere in the Code of Ordinances of the City of Festus.

B. If any Data Center initially approved as a non-Hyperscale facility subsequently expands, is modified, or is aggregated with related facilities in a manner that causes it to meet or exceed any threshold in Section 2(C), such facility shall thereafter be deemed a Hyperscale Data Center and shall be subject to all provisions of this Ordinance.

Section 7. Severability.

If any section, subsection, sentence, clause, phrase, or portion of this Ordinance is for any reason held to be invalid or unconstitutional by a court of competent jurisdiction, such decision shall not affect the validity of the remaining portions of this Ordinance, which shall be deemed severable and shall continue in full force and effect.

Section 8. Effective Date.

This Ordinance shall be in full force and effect from and after its passage and approval according to law.

PASSED AND APPROVED this ___ day of _____, 26.

Mayor, City of Festus, Missouri

ATTEST:

City Clerk

PROPOSED BALLOT

Shall the City of Festus adopt an ordinance **prohibiting hyperscale data centers** within the city limits, requiring voter approval for any proposed hyperscale data center project, and providing that this policy may not be changed without a vote of the people for ten (10) years?

YES

NO

VIII. CONCLUSION

The people of Festus have spoken. They have gathered over Fourteen hundred signatures, a number that well exceeds the number of people who voted in the last mayoral election. They have made a clear and direct demand that they be allowed to vote on whether hyperscale data centers are permitted in their city. It is now the duty of the Mayor, City Council, and City Clerk to honor the will of the people and ensure this question is placed on the ballot without further delay.

We expect prompt action and full compliance with this demand.
